

DEEP CLEANING FOR CARPETS

Visual support

Equipment and supplies (for textile use)

- Alkaline pre-wash (pH 10-12).
- Alkaline detergent (pH 10).
- Solvent based stain and spots remover.
- Acid rinse (pH 5).
- Mild deodorant (pH 7).
- Plastic toothed remover.
- Thick bristles *nylon* brush.
- Bone spatula.
- Upright vacuum cleaner with at least 1,200 watts power.
- Spray pump with at least 2 L capacity.
- Equipment for washing carpets and seats with at least 100 psi and 3 stages suction motor.
- Hand-held spray pump
- Air turbine of at least ½ HP

Considerations/Instructions

- Cleaning should be done with cleaning lights turned on and the air conditioner turned off.
- The cleaning products solutions should be prepared following the supplier indications.
- Carpet cleaning should be done to allow for carpet to be dry before first show.
- If the carpet is wet the process is not being done correctly.
- Materials used in several areas, should be cleaned frequently to avoid carrying dirt around.

Check for stains and debris.

1

With the thick bristles brush begin to sweep the carpet to remove all dust pushing it forward.

2

Vacuum the carpet with the upright vacuum cleaner.

3

Use spray pump on stained areas.

4

Scrub with thick bristles brush so that the product penetrates the carpet. Let it stand for 10 minutes.

5

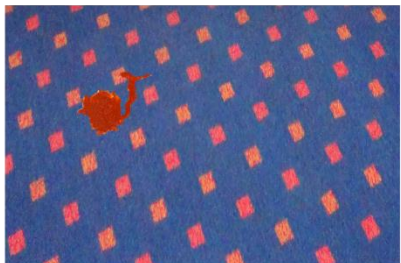

With the equipment for washing carpets and seats, inject detergent forming a line the width of the tube (handle) of the equipment and go over it three times extracting detergent on the same line. Repeat process from 5 to 7 times.

6

Process

7

If there are no **stubborn stains** or **chewing gum stuck** on the carpet, proceed to step 8. Otherwise do the following process.

7a

Pour stain and spot remover on the stain or the stuck chewing gum.

7b

Work the stain from the edges toward the center with the bone spatula and remove with the plastic toothed remover.

7c

With the equipment for washing carpets and seats, inject detergent forming a line the width of the tube (handle) of the equipment and go over it 3 times sucking on the same line. Repeat process from 5 to 7 times until you cover the full area of carpet being cleaned.

8

With the hand-held spray pump, apply deodorant and rinse on the carpet.

9

With the thick bristles brush, scrub the area you just sprayed so that the product penetrates.

10

Dry the carpet for at least 3 hours with the air turbine changing it from place to place over the cleaned area to accelerate the process.
